

SHREEJI IT SOLUTION PVT. LTD. — COMPLETE WEBSITE DEVELOPMENT PROMPT

1. PROJECT OVERVIEW

Build a complete, modern, professional, responsive business website for:

Shreeji IT Solution Pvt. Ltd.

Shreeji IT Solution Pvt. Ltd. is a Vasad-based IT solution provider founded in 2025 by **Kishan Solanki**.

The company provides technology and digital services to businesses, startups, organizations, and individuals.

Company Services

1. Web Development & SEO
2. Mobile / App Development
3. Desktop Application Development
4. UI/UX Design
5. Custom Software Development
6. AI & Operational Automation

The website should communicate:

- Professionalism
- Trust
- Simplicity
- Affordability
- Technical expertise
- Transparency
- Business-focused solutions
- Long-term client relationships

The website must NOT look like a generic template.

It should look like a genuine professional IT company's website.

2. CORE TECHNOLOGY REQUIREMENTS

Frontend Only

Build the entire website using frontend technologies.

Required Stack

- React.js
- Vite
- JSX only
- JavaScript
- Tailwind CSS
- React Router DOM
- Lucide React or another lightweight icon library

Important

Do NOT use:

- TypeScript
- `.tsx`
- Node.js backend
- Express.js backend
- MongoDB
- MySQL
- PHP
- Laravel
- Any custom backend

All components must use `.jsx`.

The final project must be deployable directly to:

- Vercel
- Netlify
- GitHub Pages if configured appropriately

3. DESIGN DIRECTION

The website should use ONLY these primary colors:

- Blue
- Black
- White

Avoid unnecessary colors.

Use different shades of blue only when required for visual hierarchy.

Suggested Visual Language

- White backgrounds
- Black text
- Deep/dark blue sections
- Blue buttons
- White text on dark sections
- Subtle gray only where absolutely necessary for borders/background separation

Do not use:

- Rainbow gradients
- Excessive glassmorphism
- Neon colors
- Overly colorful cards
- Excessive animations
- Cartoon-style illustrations

The design should feel:

Modern + Clean + Corporate + Trustworthy + Premium + Simple

4. RESPONSIVE DESIGN

The website must be fully responsive.

Support:

- Desktop
- Laptop
- Tablet
- Mobile

The mobile experience is extremely important.

On mobile:

- Header becomes a hamburger menu
- Navigation menu opens smoothly
- Cards stack vertically
- Pricing cards become vertically arranged
- Buttons become properly sized
- Text remains readable
- No horizontal scrolling
- Images remain responsive

- Forms remain usable
- Popups fit inside the viewport

5. WEBSITE STRUCTURE

Create these routes:

```
/
/about-us
/founder-profile
/lets-talk
/terms-and-conditions
```

The following sections exist on the homepage:

```
Home
About Us
Services
Plans
Why Us
How It Works
Contact / Let's Talk
Footer
```

Use React Router for page navigation.

6. GLOBAL HEADER

Create a reusable `Header.jsx`.

The same header must be used across all pages.

Header Layout

Left:

Shreeji IT Solution logo

Use a professional text/logo treatment.

If an actual logo asset is not provided, create a clean temporary text-based logo:

ShreeJi IT Solution

Do not invent a complicated logo.

Navigation

Desktop menu:

- Home
- About Us
- Services
- Plans
- Why Us
- How It Works
- Contact

Right side:

Let's Talk →

The Let's Talk button must navigate to:

`/lets-talk`

Header Behavior

- Sticky header
- White background
- Subtle bottom border/shadow
- Smooth transition while scrolling
- Active navigation state
- Responsive mobile menu
- Mobile menu should close after navigation

7. HOMEPAGE — HERO SECTION

Create a strong landing/hero section.

Main Heading

Use:

Best IT Solutions & Digital Services for Growing Businesses

Do not use incorrect wording such as:

"Best IT Solution and Digital marketing services provider"

Correct the grammar professionally.

Supporting Content

Use a message similar to:

We help businesses build, improve and grow in the digital world through reliable technology solutions, modern websites, custom software, digital experiences and smart automation.

Add another short supporting line communicating:

From idea to execution, we focus on practical solutions, transparent communication and quality development.

Hero Buttons

Primary:

Start a Project →

Navigate to:

`/lets-talk`

Secondary:

Chat on WhatsApp

When clicked, open WhatsApp with a pre-filled custom message.

Example:

Hello Shreeji IT Solution, I would like to discuss a project with your team. I would like to know more about your services and pricing.

Use the company's WhatsApp/mobile number:

9662347518

Use the appropriate WhatsApp international format for India:

919662347518

Use URL encoding for the message.

8. HERO VISUAL

On desktop, create a professional IT/business visual on the right side.

Possible visual themes:

- Software development
- Digital transformation
- Business technology
- Web/mobile development
- Automation
- Abstract technology workspace

Do not use random unrelated stock photography.

The visual should support the company's professional identity.

On mobile, stack the content naturally.

9. ABOUT US SECTION — HOMEPAGE

Create an About Us section immediately after the hero.

Desktop layout:

LEFT
Text

RIGHT
IT/Technology Image

Heading

About Shreeji IT Solution

Professionalized Content

Use the following meaning but rewrite it professionally:

Shreeji IT Solution Pvt. Ltd. is a Vasad-based IT solution provider serving businesses and organizations across Gujarat and beyond. Founded in 2025 by Kishan Solanki, the company began with a simple vision: to make reliable technology and digital solutions accessible to businesses of different sizes.

What started with a single project has grown into a developing IT solutions company focused on web development, application development, UI/UX design, custom software, SEO and AI-powered automation.

Our goal is not simply to build software. We aim to understand the actual needs of a business, identify practical opportunities for improvement and deliver technology solutions that are reliable, scalable and cost-effective.

We believe that good technology should solve real business problems, improve efficiency and help organizations grow in the digital environment.

Buttons

Add:

Read More →

Navigate to:

`/about-us`

Second:

About Founder →

Navigate to:

`/founder-profile`

10. SERVICES SECTION

Create a professional services section.

Heading

Our Services

Supporting text:

Technology solutions designed around your business needs.

Create six service cards.

SERVICE 1 — WEB DEVELOPMENT & SEO

Title:

Web Development & SEO

Description:

Modern, responsive and business-focused websites designed to establish your online presence and help your business become easier to discover through search engines.

Include:

- Business Websites
 - Landing Pages
 - Corporate Websites
 - Responsive Design
 - Website Optimization
 - SEO
 - Performance Optimization
-

SERVICE 2 — APP DEVELOPMENT

Title:

App Development

Description:

User-friendly application solutions designed to help businesses deliver better digital experiences and improve customer engagement.

Include relevant app development capabilities without making unsupported technology claims.

SERVICE 3 — DESKTOP APPLICATION DEVELOPMENT

Title:

Desktop Application Development

Description:

Custom desktop software designed around specific business workflows, internal operations and productivity requirements.

SERVICE 4 — UI/UX DESIGN

Title:

UI/UX Design

Description:

Clean, intuitive and user-focused interfaces designed to make digital products easier and more enjoyable to use.

Include:

- Wireframes
 - User flows
 - Interface design
 - Responsive design
 - Design systems
 - Prototype concepts
-

SERVICE 5 — CUSTOM SOFTWARE DEVELOPMENT

Title:

Custom Software Development

Description:

Business-specific software built around your workflows, requirements and operational challenges.

Possible examples:

- Management systems
 - ERP-style solutions
 - Business dashboards
 - Internal tools
 - Automation platforms
 - Custom portals
-

SERVICE 6 — AI & OPERATIONAL AUTOMATION

Title:

AI & Operational Automation

Description:

Practical AI and automation solutions that can help businesses reduce repetitive work, organize information and improve operational efficiency.

Do NOT make unrealistic claims such as "AI will automate your entire business."

11. SERVICE CARD INTERACTION

Each service must have:

- Icon
- Title
- Short description
- Learn More button or clickable card

When clicked, open a professional modal/popup.

The modal should contain:

- Service title
- Detailed description
- What we provide
- Suitable for
- Key benefits
- Start a Project button
- WhatsApp button

Modal Buttons

Start a Project →

Navigate to:

`/lets-talk`

Chat on WhatsApp

Open WhatsApp with a service-specific pre-filled message.

Example:

Hello Shreeji IT Solution, I am interested in your Web Development & SEO service. I would like to discuss my requirements and get more information.

Generate a different message dynamically based on the selected service.

Modal requirements:

- Close button
- Click outside to close
- Escape key to close

- Prevent unnecessary page scrolling while modal is open
 - Mobile responsive
 - Accessible buttons
-

12. SERVICES CTA

At the bottom of the Services section add a centered CTA.

Heading:

Have a project in mind? Let's build it together.

Buttons:

Start a Project →

and

Chat on WhatsApp

13. PLANS / PRICING SECTION

Create a professional pricing section.

Heading:

Simple & Transparent Plans

Supporting text:

Flexible options for businesses at different stages. If your requirements are different, we can discuss a custom solution.

Create four pricing cards.

PLAN 1 — STARTER WEBSITE

Price:

₹9,999

Include:

- Single landing-page website
- Responsive design
- Basic SEO
- Domain for 1 year
- Hosting for 1 year
- Contact/lead section
- Basic performance optimization

CTA:

Start a Project

PLAN 2 — BUSINESS WEBSITE

Price:

₹18,999

Badge:

Most Popular

Include:

- 7–8 page website
- Advanced SEO
- Responsive design
- Domain for 1 year
- Hosting for 1 year
- Contact/lead forms
- Performance optimization
- Professional business structure
- Social media integration where applicable

CTA:

Start a Project

PLAN 3 — PROFESSIONAL / CUSTOM WEBSITE

Price:

₹28,999

Include:

- Full-featured website
- Admin panel
- Pages according to requirements
- Advanced SEO
- Domain for 1 year
- Hosting for 1 year
- Dynamic content management where applicable
- Business-specific features
- Additional customization

CTA:

Start a Project

PLAN 4 — CUSTOM SOFTWARE

Price:

Let's Discuss

Do NOT show a fixed price.

Description:

Custom software development is priced according to project scope, features, integrations, complexity, timeline and business requirements.

Include:

- Requirement analysis
- Custom workflows
- Business-specific software
- Dashboards
- Integrations
- Automation
- Scalable architecture

CTA:

Discuss Your Project

IMPORTANT PRICING DISCLAIMER

Clearly display:

Pricing shown above represents starting/package pricing for the listed scope. Final pricing may vary depending on requirements, content, integrations, third-party services, revisions and project complexity.

Do not falsely imply that every project will always be delivered for exactly the displayed price.

14. WHY US SECTION

Heading:

Why Choose Shreeji IT Solution?

Do not make unsupported claims such as:

- "We are the #1 company"
- "Guaranteed success"
- "Best in Gujarat"
- "100% guaranteed ROI"

Instead focus on genuine differentiators.

Create approximately 10 FAQ-style questions that new clients commonly have.

FAQ 1

Do I need a website for my business?

A professional website can help a business establish an online presence, communicate its services clearly and provide customers with an easy way to contact the business.

FAQ 2

How much does a website cost?

The cost depends on the number of pages, features, design requirements, integrations, SEO requirements and overall complexity. Our listed plans provide starting options, while custom requirements can be discussed separately.

FAQ 3

How long does a website take to develop?

The timeline depends on project scope, content availability, revisions and required functionality. A timeline will be discussed before development begins.

FAQ 4

Do you provide domain and hosting?

Yes. Selected website plans include domain and hosting for one year as specified in the package.

Clearly mention that renewal after the included period may involve additional charges.

FAQ 5

Can you redesign my existing website?

Yes. Existing websites can be reviewed and redesigned depending on the technical condition, business requirements and desired outcome.

FAQ 6

Do you provide SEO?

Yes. SEO services are included according to the selected plan. SEO scope should be clearly defined before project confirmation.

Do not guarantee a specific Google ranking.

FAQ 7

Can you build custom software for my business?

Yes. Custom software can be developed according to specific workflows and requirements. Scope and pricing are determined after requirement analysis.

FAQ 8

Do you provide maintenance after development?

Maintenance and post-launch support can be discussed depending on the project and support requirements. Clearly define whether future maintenance is included or billed separately.

FAQ 9

How does payment work?

Use the company's standard milestone structure:

- 30% advance before development begins
- 30% at approximately the halfway milestone
- Remaining 40% before final delivery / production handover

Clearly document this in the project agreement.

FAQ 10

What happens after I contact you?

We first understand your requirements, discuss possible solutions, define the scope, estimate the timeline and budget, and proceed after both parties agree to the project terms.

15. HOW IT WORKS SECTION

Heading:

How It Works

Create a clean step-by-step timeline.

STEP 1 — Contact Us

You contact us through the website, WhatsApp, email or another available communication channel.

STEP 2 — Share Your Idea

Tell us about your business, problem, idea, requirements and expected outcome.

STEP 3 — Requirement Discussion

We discuss the actual project requirements, features, target users, scope and technical considerations.

STEP 4 — Prototype & Planning

Where appropriate, we define the structure/prototype, project scope, estimated timeline and budget.

STEP 5 — Project Confirmation

Both parties review and agree on the scope, pricing, milestones, responsibilities and terms.

STEP 6 — Development Begins

Development starts after project confirmation and receipt of the agreed advance payment.

STEP 7 — Review & Delivery

The project is reviewed, required agreed revisions are handled and the final product is prepared for delivery/deployment.

16. CONTACT / LET'S TALK SECTION

The homepage should have a Contact / Let's Talk section.

This section should contain two columns.

LEFT SIDE — CONTACT INFORMATION

Heading:

Let's Talk About Your Project

Text:

Have an idea, business requirement or project in mind? Tell us what you are looking for and our team can discuss the next steps with you.

Mobile

+91 96623 47518

Make it clickable using:

`tel:+919662347518`

Email

shreejiitsolution120@gmail.com

Make it clickable.

WhatsApp

Chat on WhatsApp

Open WhatsApp with a pre-filled message.

Example:

`Hello Shreeji IT Solution, I would like to discuss a project. Please let me know how we can proceed.`

LinkedIn

Official company LinkedIn:

`https://www.linkedin.com/company/shreeji-it-solution-pvt-ltd/?viewAsMember=true`

Open external links in a new tab with appropriate security attributes.

17. CONTACT FORM

Right side:

Create a simple professional contact form.

Fields:

- Full Name
- Email
- Phone Number
- Company / Business Name (optional)
- Service Interested In
- Message

Button:

Send Message

FRONTEND-ONLY EMAIL IMPLEMENTATION

There is NO backend.

Use **EmailJS** if automatic email delivery is required.

The form should send the submission to:

shreejiitsolution120@gmail.com

Do not hard-code EmailJS private credentials in source code.

Use environment variables for:

```
VITE_EMAILJS_SERVICE_ID
VITE_EMAILJS_TEMPLATE_ID
VITE_EMAILJS_PUBLIC_KEY
```

Create a clear `.env.example`.

If EmailJS is not configured, provide a graceful fallback using `mailto:` rather than showing a broken form.

Form UX

Show:

- Loading state
- Success message
- Error message
- Validation errors
- Disabled button while submitting
- Clear form after successful submission

Validate:

- Required name
- Valid email
- Valid phone where applicable

- Required message

Do not store contact form data locally unless required.

18. DEDICATED LET'S TALK PAGE

Route:

`/lets-talk`

Use the same:

- Header
- Footer
- Branding
- Colors

Create a dedicated contact page.

Use the same contact content as the homepage Contact section but give it more space.

Layout:

LEFT
Contact details

RIGHT
Contact form

Add a strong heading:

Let's Start Your Project

Supporting text:

Tell us about your idea, business or project requirements. We'll use the information to understand what you need and discuss the next steps.

The Contact navigation item should scroll to the homepage Contact section.

The Let's Talk button should navigate to:

`/lets-talk`

19. ABOUT US PAGE

Route:

/about-us

Use the same header and footer.

Do NOT use a large hero image.

The page should tell the company's story primarily through clean text and point-wise sections.

Suggested Structure

About Shreeji IT Solution

Then:

Our Beginning

- Founded in 2025
- Started with the goal of making practical IT solutions accessible to businesses
- Began with a single project
- Gradually expanded service capabilities

Our Vision

- Help businesses use technology effectively
- Build practical and reliable digital solutions
- Make technology easier to understand for business owners

Our Mission

- Understand the actual business requirement
- Build suitable technology solutions
- Maintain transparent communication
- Focus on quality and usability
- Deliver cost-conscious solutions

What We Do

List all six services.

Our Approach

- Understand
- Plan
- Design
- Develop
- Test

- Deliver
- Support

Who We Serve

Potentially:

- Small businesses
- Startups
- Local businesses
- Organizations
- Professionals
- Growing businesses

Do not claim to have served specific companies unless actual clients are provided.

20. FOUNDER PROFILE PAGE

Route:

/founder-profile

Use the same header and footer.

Layout on desktop:

LEFT
Founder information

RIGHT
Founder photo

On mobile, stack vertically.

Founder:

Kishan Solanki

Founder of:

Shreeji IT Solution Pvt. Ltd.

Create a professional founder introduction based on the following factual information:

- Founder of Shreeji IT Solution Pvt. Ltd.
- Started the company in 2025
- Technology and software development background
- Focused on building practical digital solutions for businesses
- Interested in software development, technology and digital innovation

Do not invent:

- Awards
- Clients
- Years of experience
- Certifications
- Company revenue
- Team size
- Fake achievements

unless explicitly provided.

Founder LinkedIn

Use:

<https://www.linkedin.com/in/kishankumar-solanki-01691835/>

Button:

Connect on LinkedIn →

Open in a new tab.

Long Content

If founder content becomes long, use:

Read More

and

Read Less

or an expandable section.

Do not make the page excessively long.

21. TERMS & CONDITIONS PAGE

Route:

`/terms-and-conditions`

Create a professional Terms & Conditions page for an IT services company.

IMPORTANT:

This should be presented as a general business terms template and should not claim to be legal advice.

Include sections covering:

1. Introduction

Purpose of the website and services.

2. Scope of Services

Web development, application development, desktop software, UI/UX, custom software, SEO, AI/automation and related services.

3. Project Requirements

Client must provide accurate requirements, content, assets and information required for the project.

4. Project Scope

The agreed scope will determine what is included.

Additional features outside the agreed scope may involve additional charges and timeline changes.

5. Payment Terms

Standard payment structure:

30% Advance

Before development begins.

30% Mid-Project Payment

At approximately the agreed halfway milestone.

40% Final Payment

Before final delivery, production handover, source-code handover or final deployment, as agreed in the project contract.

6. Payment Delays

Delays in payment may pause development and affect the delivery timeline.

7. Domain & Hosting

If domain and hosting are included in a package, they are included for the specified period, generally one year.

Renewal charges after the included period are separate unless explicitly stated otherwise.

8. Content Responsibility

The client is responsible for providing legally usable:

- Images
- Logos
- Text
- Videos
- Documents
- Brand assets
- Third-party materials

9. Third-Party Services

Third-party services may include:

- Hosting
- Domain providers
- Payment gateways
- APIs
- Email services
- Maps
- Analytics
- Cloud services
- Plugins

Third-party charges and policy changes are outside the company's direct control unless specifically included in the agreement.

10. Revisions

Only the revisions included in the agreed project scope/package are included.

Additional revisions may require additional time or cost.

11. Timeline

Estimated timelines depend on:

- Scope
- Client feedback
- Content availability
- Third-party dependencies
- Payment milestones

- Approval delays

12. Cancellation

Define cancellation and payment treatment clearly.

The advance payment may be non-refundable once substantial project work has started, subject to the specific project agreement and applicable law.

Do not make legally absolute claims that may conflict with applicable law.

13. Intellectual Property

Clearly explain when ownership/source-code rights are transferred.

A suitable general structure:

- Client-owned content remains the client's property.
- Third-party assets remain subject to their respective licenses.
- Custom project deliverables are transferred according to the agreed payment and project terms.
- Unpaid work does not automatically transfer ownership.

14. Portfolio Rights

If agreed with the client, Shreeji IT Solution may showcase completed work in its portfolio.

Provide an option to exclude a project from public portfolio use if agreed in writing.

15. Confidentiality

Both parties should reasonably protect confidential project information.

16. Security

The company will take reasonable technical measures within the agreed project scope but cannot guarantee absolute security against every external threat.

17. SEO Disclaimer

SEO does not guarantee:

- Specific Google ranking
- Specific traffic
- Specific leads
- Specific revenue

18. AI Services Disclaimer

AI-generated systems may produce inaccurate or unexpected outputs.

Human review may be required depending on the application.

19. Website Availability

No guarantee of uninterrupted availability of third-party hosting, domain, APIs or external services.

20. Limitation of Liability

Use reasonable legally cautious language and avoid extreme or unenforceable claims.

21. Changes to Terms

The company may update website terms where appropriate.

22. Contact

Email:

shreejiitsolution120@gmail.com

Phone:

+91 96623 47518

Location:

Vasad, Anand, Gujarat – 388305

Add a visible notice:

These terms are provided as a general business template and should be reviewed and adapted with qualified legal advice before being used as a binding contractual document.

22. FOOTER

Create a reusable `Footer.jsx`.

Use the same footer across all pages.

Footer Layout

Left:

Logo / Company Name

Shreeji IT Solution Pvt. Ltd.

Address:

Vasad, Anand, Gujarat – 388305

Short description:

Practical IT and digital solutions for businesses.

Quick Links

- Home
- About Us
- Services
- Plans
- Why Us
- How It Works
- Contact
- Let's Talk

Services

- Web Development & SEO
- App Development
- Desktop Applications
- UI/UX Design
- Custom Software
- AI & Automation

Company

- About Us
- Founder Profile
- Terms & Conditions
- Contact

Social

LinkedIn:

<https://www.linkedin.com/company/shreeji-it-solution-pvt-ltd/?viewAsMember=true>

Bottom Footer

Display:

© 2025–2026 Shreeji IT Solution Pvt. Ltd. All Rights Reserved.

Do not hard-code a misleading year if the current year changes. Generate the current year dynamically with JavaScript.

23. NAVIGATION BEHAVIOR

Homepage navigation should use smooth scrolling for sections:

Home
About Us
Services
Plans
Why Us
How It Works
Contact

Example:

```
/#about  
/#services  
/#plans  
/#why-us  
/#how-it-works  
/#contact
```

But:

Let's Talk

must navigate to:

```
/lets-talk
```

Buttons such as:

- Read More
- About Founder
- Start a Project
- Discuss Your Project

must navigate correctly.

No broken links.

24. WHATSAPP INTEGRATION

Use the company number:

+91 96623 47518

WhatsApp number:

919662347518

Create a reusable WhatsApp utility function.

Messages must be dynamically generated.

Examples:

General

Hello Shreeji IT Solution, I would like to discuss a project with your team. Please let me know how we can proceed.

Web Development

Hello Shreeji IT Solution, I am interested in your Web Development & SEO service. I would like to discuss my requirements.

App Development

Hello Shreeji IT Solution, I am interested in App Development. I would like to discuss my project requirements.

The message should be URL encoded.

25. COMPONENT ARCHITECTURE

Use reusable components.

Suggested structure:

```
src/
├── assets/
│   ├── images/
│   └── logo/
├── components/
│   ├── Header.jsx
│   ├── Footer.jsx
│   ├── Hero.jsx
│   ├── AboutSection.jsx
│   ├── ServiceCard.jsx
│   └── ServiceModal.jsx
```

Avoid excessive animations.

Use subtle animations such as:

- Fade-in
- Slide-up
- Hover elevation
- Button transitions
- Modal transitions

Animations must not hurt performance.

Respect:

`prefers-reduced-motion`

where practical.

27. ACCESSIBILITY

Implement:

- Semantic HTML
- Proper headings
- Alt text
- Keyboard-accessible buttons
- Accessible modal behavior
- Visible focus states
- Form labels
- Error messages
- Sufficient contrast
- `aria-label` where appropriate

Do not use clickable `<div>` elements when a button or link should be used.

28. SEO

Since this is a business website, implement basic frontend SEO.

Use appropriate:

- Page titles
- Meta descriptions
- Heading structure

- Image alt text
- Canonical URLs where appropriate
- Open Graph metadata where practical
- Favicon
- Robots configuration
- Sitemap if appropriate for the deployment setup

Suggested homepage title:

Shreeji IT Solution Pvt. Ltd. | IT Solutions & Digital Services

Suggested description:

Shreeji IT Solution Pvt. Ltd. provides web development, app development, desktop software, UI/UX, custom software, SEO and AI-powered automation solutions from Vasad, Gujarat.

Do not use keyword stuffing.

29. PERFORMANCE

The website must be optimized for production.

Use:

- Lazy loading where appropriate
- Optimized images
- Responsive image sizes
- Minimal unnecessary dependencies
- Code splitting where useful
- No unnecessary API calls
- No unnecessary backend
- Efficient React rendering

Avoid huge images and unoptimized assets.

30. SECURITY

Even though this is frontend-only:

- Never expose private API keys
- Never expose EmailJS private credentials
- Use environment variables
- Sanitize/validate user input

- Do not store sensitive contact information unnecessarily
- Use HTTPS deployment
- External links should use safe target behavior

Remember:

Frontend-only applications cannot securely hide secrets.

31. ERROR / EMPTY STATES

Handle:

- Email submission failure
- Invalid form data
- Missing environment variables
- Broken images
- Service modal errors
- Mobile navigation issues

Do not show technical errors such as raw JavaScript exceptions to users.

Show friendly messages.

32. 404 PAGE

Create a professional 404 page.

Message:

Page Not Found

Supporting text:

The page you're looking for may have been moved or does not exist.

Button:

Back to Home

33. FAVICON & BRANDING

Create a simple favicon using the company branding.

Use:

S

or an appropriate Shreeji IT Solution monogram if a real logo asset is not provided.

Do not create a fake complex brand identity.

34. IMPORTANT BUSINESS TRANSPARENCY

Do not invent:

- Client names
- Client logos
- Testimonials
- Reviews
- Google ratings
- Awards
- Certifications
- Revenue
- Number of employees
- Number of projects
- Years of experience
- Partnership claims
- Government affiliations
- Technology partnerships

unless actual information is supplied.

If testimonials are not provided, do NOT create fake testimonials.

If statistics are not provided, do NOT create fake statistics.

The website should feel trustworthy because of clear information, not fabricated social proof.

35. CALL-TO-ACTION STRATEGY

Throughout the website, use consistent CTA wording.

Primary:

Start a Project →

Secondary:

Chat on WhatsApp

Additional:

Let's Talk →

Do not use dozens of different CTA phrases.

36. CONTENT TONE

The writing should be:

- Professional
- Simple
- Human
- Clear
- Trustworthy
- Business-friendly

Avoid excessive technical jargon.

The target customer may not be a developer.

Explain technical services in business-friendly language.

Do not overpromise.

Instead of:

We guarantee your business will become successful.

Use:

We build practical digital solutions designed around your business goals.

37. IMPORTANT CONTACT INFORMATION

Use these exact details:

Company

Shreeji IT Solution Pvt. Ltd.

Founder

Kishan Solanki

Location

Vasad, Anand, Gujarat – 388305

Phone

+91 96623 47518

Email

shreejiitsolution120@gmail.com

Company LinkedIn

<https://www.linkedin.com/company/shreeji-it-solution-pvt-ltd/?viewAsMember=true>

Founder LinkedIn

<https://www.linkedin.com/in/kishankumar-solanki-01691835/>

38. FINAL QUALITY REQUIREMENTS

Before considering the project complete, verify:

Navigation

- Every navbar item works
- Every footer link works
- Every CTA works
- No broken routes
- Back/forward browser navigation works

Mobile

- Header works
- Menu works
- Modals work
- Forms work

- Pricing cards work
- No horizontal overflow

Forms

- Validation works
- EmailJS integration works when configured
- Error handling works
- Success state works
- No backend dependency

WhatsApp

- Correct number
- Correct URL encoding
- Custom messages
- Service-specific messages

Pages

- Home
- About Us
- Founder Profile
- Let's Talk
- Terms & Conditions
- 404

Visual

- Blue / Black / White only
- Consistent typography
- Consistent spacing
- Professional cards
- Professional responsive layout

Technical

- JSX only
- No TSX
- No backend
- No database
- Vercel/Netlify compatible
- Environment variables documented
- Production build works without errors

39. DELIVERABLE

Generate the complete working React/Vite project.

Do not only create a visual mockup.

The result must contain:

- Complete React components
- Complete routes
- Complete pages
- Responsive design
- Functional navigation
- Functional service modals
- Functional WhatsApp buttons
- Functional contact form integration
- Pricing section
- FAQ section
- How It Works section
- About Us page
- Founder Profile page
- Let's Talk page
- Terms & Conditions page
- 404 page
- Footer
- Header
- SEO metadata
- Proper project structure
- `.env.example`
- README with setup and deployment instructions

The application must run with:

```
npm install  
npm run dev
```

and build successfully with:

```
npm run build
```

The final website should be ready for deployment to Vercel or Netlify.

40. FINAL DESIGN GOAL

The final website should give a visitor the immediate impression:

"This is a genuine, professional IT company that understands business requirements and provides practical technology solutions."

Keep the interface simple.

Do not overcrowd the page.

Do not use unnecessary animations.

Do not use fake claims.

Do not make the website look like an AI-generated template.

Focus on:

Trust + Clarity + Professional Design + Real Business Information + Easy Contact.
