WHO WE ARE

About Shreeji IT Solution

Shreeji IT Solution Pvt. Ltd. is a Vasad-based IT solution provider founded in 2025 by **Kishan Solanki**. We help businesses build, improve and grow in the digital world through practical technology and digital solutions.

Our focus is to understand the actual requirements of a business and provide reliable, cost-conscious and high-quality solutions that help businesses establish and grow their digital presence. What started with a single project has developed into a growing IT solutions initiative focused on providing practical digital solutions to businesses and organizations.

Our goal is not simply to build software or websites. We aim to understand the actual business requirement, identify practical opportunities and deliver technology solutions that are reliable, useful, scalable and cost-conscious.

Our Vision

To make practical technology and digital solutions more accessible to businesses and help them build a stronger presence in the digital world.

Our Mission

Understand real business problems and provide suitable technology solutions through quality development, clear communication and cost-conscious delivery.

What Guides Our Work

Quality Development

Clear Communication

Practical Technology

Cost-Conscious Solutions

User-Focused Design

Reliable Delivery

"We don't believe in building technology just for the sake of technology. We first understand the business requirement, then work toward a practical solution that fits the actual need."

OUR PROCESS

How We Work

01

Understand

We understand your business, idea, requirements and objectives.

02

Plan

We define the project scope, features, timeline and estimated budget.

03

Design

We create the structure, user experience and visual direction.

04

Develop

We develop, test and refine the solution.

05

Deliver

We prepare the final solution for deployment and handover.

06

Support

We provide appropriate post-development support as required.
